Oracle Process Cloud Service

Design, implement, and manage business processes

ORACLE Integration Cloud

In the following video, we'll show you the Oracle Process Cloud Service workspace, whose main function is to organize and manage documents.

How to add value to your business by improving operational processes using Oracle Integration Cloud (OIC).

Learn how to collaboratively model your business processes, design forms, model decisions, and deploy your business processes in a matter of days.

Oracle Integration Cloud Service

Ranked by Gartner itself as a leader in its Magic Quadrant for Enterprise Integration Platform as a Service (iPaaS), thanks to its strong execution and comprehensive vision.

Some of the main features of Oracle BPM Cloud are:

1. Collaborative application development
(processes, forms, rules, documents, services, and data) without the need to write code, entirely web-based

2. Creation of dynamic user interfaces
that are developed once and can be deployed on both web and mobile platforms

3. Reliable connectivity with SOAP and REST interfaces
For more complex integrations, use Oracle Cloud Integration

4. View, monitor, reassign, and/or delegate process tasks
while maintaining full visibility at all times

5. Access and complete tasks using the BPM mobile app
in both online and offline modes

6. Easily comment on and share documents

7. Monitor processes, tasks, and people in real time
using a rich, intuitive, mobile-friendly graphical interface.

But OIC Oracle isn't just PCS

It has a section for creating interfaces.

This solution is used for **cloud-based development of web or mobile applications** without the need for low-level coding.

Visual Builder Cloud Service (VBCS)

And a section dedicated to integrations.

With this part of the solution, we can **create system integration flows** that support the use of backends and also offer native integration with Oracle's SaaS products.

Integration Cloud Service

Unikal Tech Partners,
Oracle Integration Cloud Specialist

Unikal Tech Partners is a multi-specialist IT services group that brings together expertise, talent and specialised capabilities to help organisations address their challenges in digital transformation, cloud, data, business processes and cybersecurity.

We take an **end-to-end approach**, combining specialised teams and technology capabilities to design, build and operate solutions tailored to each organisation's needs. **Our specialists in Oracle Integration Cloud support our clients throughout the entire lifecycle of their solutions, from strategy and design through implementation, evolution and ongoing support.**

With our **"One Partner. All IT"** proposition, we simplify technology management by providing a single point of contact and an integrated view of IT capabilities, with a clear focus on efficiency, consistency and business impact.

Discover everything we can do for your organisation at **unikal.tech**
or contact us at **marketing@unikal.tech**.
